Project Check-In

Community Research & Understanding

Kelly Holtzman

February 3, 2021

Chosen UN/SDG Area

Goal 12: Ensure sustainable consumption and production patterns:

12.7 Promote public procurement practices that are sustainable, in accordance with national policies and priorities

12.8 By 2030, ensure that people everywhere have the relevant information and awareness for sustainable development and lifestyles in harmony with nature

12.A Support developing countries to strengthen their scientific and technological capacity to move towards more sustainable patterns of consumption and production

12.B Develop and implement tools to monitor sustainable development impacts for sustainable tourism that creates jobs and promotes local culture and products

Meets...

Community Meal Planner

My project will be to create tool(s) that support community cultivation and service context orientations: namely a recipe discussion forum and possibly a tool to suggest local businesses selling local foods.

The integration of convenience tools with support discussion and personal involvement should influence members to think outside of the current limitations and adopt sustainable practices and critical thinking.

Community Research Documents

1. *Technology Steward Activity*

I expect that my exploration would invite constructive criticism of current practices and self-reflection when it comes to 'simple' meal planning

2. *Technology Configuration Inventory*

The community isn't really driving change, it feels like the market and profit drive what tools are available. Convenience. Single-person focus.

3. *Community Characteristics Orientation*

Big focus on individual participation, content. Should be growing the community cultivation.
