Community of Meal Planners Forums

Supporting UNDP Goal 12: Sustainable Consumption

A forum application to support community discussion for meal planning, sustainable practices, and education.

Will cater to:

- Meal plan software developers, companies
- Meal plan consumers (*) and producers
- People interested in sustainable practices
- Curious people

Aiming for Community Cultivation orientation

Project Options

1. **Wordpress.**

   Popular CMS. Must host server on my own. Most work to implement.

2. **Flutter.**

   Popular SDK. Can use Google services. Both mobile and web development. Best option.

3. **Subreddit.**

   No software development. No way for companies to adopt the forum. Least work to implement

Project Scope Items/Sprints

1. *Post and Account Database*

   Require a database to store information.

2. *Forum Structure*

   The GUI of the application. Posts, Threads, Account creation and Topics.

3. *Forum Features*

   Search functionality (particularly Topics). Endpoints for other databases. Will be adding a Recipe database.

The creation of the Forum is MVP 1. The endpoints for other services is MVP 2.

Questions? Suggestions?
